DETAILED ACTION

Priority

1. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date because of the following:

Applicant needs to add claim to the priority to the first sentence of the specification.

Information Disclosure Statement

2. Information Disclosure Statement submitted by applicant on 08/25/2003 and has been considered. See attached PTO-1449.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*,

418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,631,454. Although the conflicting claims are not identical, they are not patentably distinct from each other because, the subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: claims of instant application claims an apparatus comprising: a data storage unit, of a cache, to speculatively provide data responsive to an access for an instruction; circuitry coupled to said data storage unit to perform one or more arithmetic logic unit (ALU) functions specified by said instruction on the speculatively provided data; hit/miss logic, of the cache, to determine if said access was a hit or a miss; and a replay mechanism coupled to the hit/miss logic to replay said instruction if the access is determined to be a miss, and the claims in the patent 6,631,454, claiming an apparatus comprising: a cache memory having a data storage unit and hit/miss logic, wherein the data storage unit is clocked at a faster frequency than the hit/miss logic to speculatively provide data from said data storage unit for an instruction to be executed prior to verification from said hit/miss logic that the speculatively provided data are correct; and a replay mechanism coupled to the hit/miss logic to replay an executed instruction that received speculatively provided data

from said data storage unit responsive to an access later determined to be a miss by the hit/miss logic. Therefore, Claim(s) 1-17 of Patent No. 6,631,454 contain(s) every element of claim(s) 1-27 of the instant application and as such anticipate(s) claim(s) of the instant application.

5. "A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (Affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within that genus). " ELI LILLY AND COMPANY v BARR LABORATORIES, INC., United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

6. Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
